

Project Submission

Dear Students, your project submission dates are as follows:

20 November 2018 (Respective Lab Timings)

21 November 2018 (Respective Lab Timings)

Evaluation will be as follows:

Project proposal - 3 (Already Done)

Working code - 5

Project Report – 3

Project presentation – 4

Project Poster – 3

Project Video - 2

Layout/Guidelines for the Project Presentation using Power-point

1st Slide: Name-Roll No-Batch No, Title of the project and Objectives of Project

2nd Slide: Usability of the project/Usefulness Legal-Ethical-security issues associated with the project

3rd-6th Slide: Flow Chart/ Block Diagram/use case diagram/ class diagram

7-9th Slide: New features of the project/Specific Contribution/Functionality of the project

10th -12th Slide: Limitations of the project/ Languages-Technologies used/Implementation Issues/ Challenges faced/ Learnings from the project

Font Size should not be less than 20. Overall Presentation should follow the best practices for preparing the presentation. Assessment will be based on the content and design of presentation, presentation skills and how well you will be able to describe your work with in the given time of 7 minutes.

Report Making Guidelines

Minimum Size- 10 Pages Maximum Size-15 Pages

Font size should not be more than 12

Title Page should include- Name, Photo, Roll Number, Batch, Email, Department and University Name with Logo, Title of the Project

Other Things to be included in the project

Introduction related to the domain area of the project – Max 1 page

Problem Statement/ Abstract of the project and objectives

Why and how the project was chosen- Max one page (Give proper justification)

Literature Survey/background search/study of similar projects

Project Design Diagram/use case diagram/class diagram/Flow Diagram/ Block diagram etc.

Functionality of the project/snap shots Testing procedure/examples

Implementation details/demonstration details Project Development Time Schedule

Limitations and Future enhancements Learnings and reflections from the project

(No coding is to be included) You have to upload cod on Github and include Github link into the report.

Assessment will be based on the plagiarism score, originality, Presentation and language of the report, Structure and selection of the material and the content of the report.

Guideline to making Poster

- Decide on a title. A poster needs a good title and clear abstract.
- Write a 4 or 5 bullet point summary of your work: turn these into informative section headings.
- Add big diagrams making good use of colour.
- Make the message simple enough to be understood, but do not dumb it down. Do not use too many large sections of text.
- A clear structure is needed, you are telling a story so make sure there is a logical flow to the poster.
- Discuss with a friend or fellow student. Can the points be understood? Does it sound exciting?

Guideline to make Video

You must describe your project in minimum 3 minute and maximum 5 minute in the video.
